Show Hello World.

name suggest there might be a git repo at play

<https://gitgood.2020.chall.actf.co/.git/config>

confirms that:

I saw **git-dumper.py** (python3) used in a previous challenge writeup.

You can point that at the

<https://gitgood.2020.chall.actf.co/.git>

and give it an output directory.

It will clone the repo into your local folder.

You can then use SourceTree or other git commands to see the history and the flag is in one of the historic files.
